

# Grorich Tensystem Pvt Ltd.

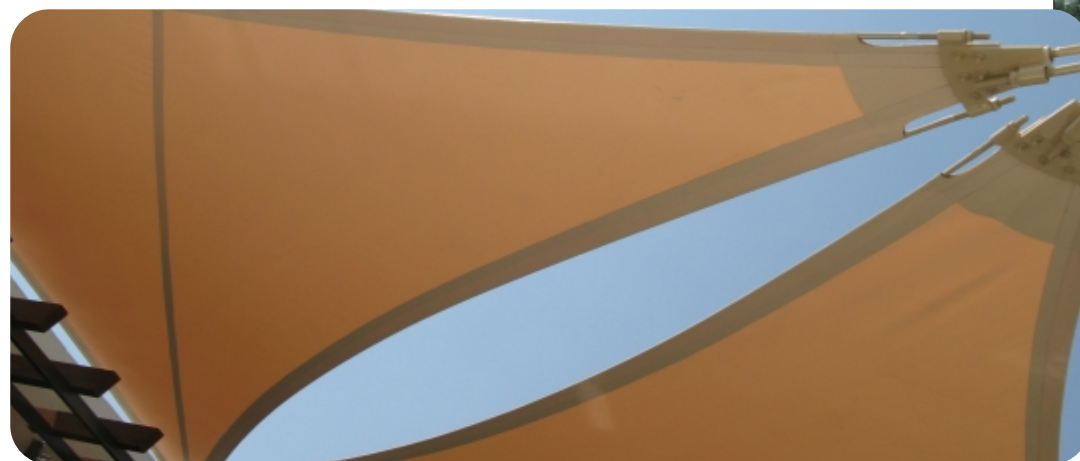

## Tensile Membrane Structures

Grorich provides you with innovative and contemporary roofing concepts called Tensile Membrane structures for your outdoor areas like Cafeterias, Meeting & Get-together areas, Swimming Pool areas, Outdoor Presentation areas, Prayer Halls, Sports complexes, Amphitheatre, Domes etc., These Tensile Membrane structures provide you with privacy, protection against sun, rain, heat. Tensile Membrane structures are strong structures built without interfacing or damaging other adjacent elements and architecture. They also provide the flexibility to work with various shapes and can be erected within the minimum time period.

Grorich adopts a concept to completion methodology. Grorich consults, designs, plans these structures and then specifies various loading, cutting patterns, fabrication and erection options. The special attributes of these Tensile structures are that they are elegant both during the day and at night. The fabric seems diffuse and complement light.

- \* The Tensile Membrane Structure are designed to sustain
- \* Wind pressure
- \* Temperature fluctuations
- \* Rain
- \* Solar radiation and
- \* Require minimum structural support

The structures are not susceptible to vibration, fatigue, excessive deflection or instability.

Simple Shade  
to Shelter!
